PROFESSIONAL SUMMARY

Entry-level Full-Stack (MERN) Developer and Computer Science undergraduate with proven execution through a hackathon-winning fintech application and multiple self-driven projects. Strong foundation in JavaScript, backend API development, databases, and system design. Demonstrated ability to build, integrate, and deploy functional software under real constraints. Seeking internship and entry-level software engineering roles.

AREAS OF EXPERTISE

- MERN Stack (MongoDB, Express.js, React.js, Node.js)
- REST API Development and Backend Logic
- JavaScript (ES6+), C, Python
- Data Structures and Algorithms (Foundational)
- Git, GitHub, Version Control
- Cybersecurity Fundamentals

PROJECTS

USDT Flow Hackathon Winning Fintech Application

Designed and built a cybersecurity-focused application simulating encrypted transaction flows and logic-based progression. Implemented transaction logic demonstrating principles of secure digital systems and traceability. Developed interactive user workflows highlighting strategic decision-making in financial systems. Collaborated in a fast-paced team environment with clear ownership and rapid iteration. Secured 1st Place at CryptoSolve: Fintech App Expo during National Cyber Security Awareness Month at SRM IST.

No-Drop Full-Stack MERN Web Application

Designed and developed a MERN-based platform to track academic consistency and engagement indicators. Built responsive frontend using React.js with reusable, modular components. Engineered backend APIs using Node.js and Express.js for application logic and data handling. Integrated MongoDB for persistent storage and structured querying. Deployed production build on Vercel using GitHub-based version control workflow.

Ultrasonic Radar System

Engineered a 40 cm ultrasonic radar system for real-time object detection and distance visualization. Implemented sensor interfacing and real-time data processing logic. Converted raw sensor data into visual output for spatial awareness simulation.

EXPERIENCE

SRM Institute of Science and Technology (SRMIST) — Chennai, India

CSE Undergraduate | Student Research and Development

Aug 2025 – Present

Developed foundational computer science skills across programming, web development, and system design. Built and iterated on early-stage software projects using modern web technologies. Participated in hackathons, coding contests, and collaborative technical initiatives. Explored AI fundamentals alongside core full-stack development.

EDUCATION

SRM Institute of Science and Technology, Chennai

Bachelor of Technology (B.Tech) Computer Science Engineering

Expected Graduation: 2029

ACHIEVEMENTS

1st Place CryptoSolve: Fintech App Expo, SRM Institute of Science and Technology
Taekwondo Black Belt with 14+ competitive medals
